

# KINDERGATE PARENTAL CONTROL

Internet Parental Control, Monitoring and Statistics

---

## PARENTAL CONTROL FUNCTIONS

**KinderGate Parental Control** is a tool that allows home users to control Web resources used by their underage children.

### Features:

- Blocking unwanted URL categories
- Protecting kids from unwanted friends
- Blocking dangerous websites
- Setting Internet access mode
- Messengers and files download control
- Monitoring and statistics

## BLOCKING UNWANTED URL CATEGORIES

With UserGate Parental Control, parents can deny access to web sites with adult content and block a wide range of other URL categories, including resources containing malicious software, web sites related to drugs and violence, gaming resources, etc.

The tool can also monitor categories of web pages visited by your child without denying access to any resources.

The program uses BrightCloud filtering module with a database of 500 million web sites that is kept updated all the time.

## PROTECT YOUR CHILD FROM UNWANTED FRIENDS

Online dating sites and social networks are being extensively used by pedophiles and maniacs.

Resorting to anonymity on the Internet, pedophiles search for potential victims among children, often telling they are the same age with them.

According to the US National Center for Missing and Exploited Children, one of every five children aged 10 to 17 has received sexually-related offers from pedophiles over the Internet.

A popular social network MySpace.com deleted 90 thousand accounts registered by users found practicing sexual harassment in 2008.

### BLOCK DANGEROUS WEBSITES

The Internet becomes a more dangerous environment every day.

- Computers get infected by over 90% of viruses via the Internet
- The number of infected websites grows continuously
- A lot of phishing sites have appeared recently
- Infected computers are extensively used for spamming purposes
- Growing popularity of social networks gave way to new types of fraudulent activity with the intruder receiving his victim's personal information.

With KinderGate, you may block access to over **5 million** websites that feature phishing, Trojans, keyloggers, botnets and other malicious software.

The database of dangerous websites is updated on a daily basis.

### DYNAMIC APPROACH BENEFITS

#### PORN SITE CREATION EXAMPLE:

1. Create a website about butterflies
2. Classify the website as an educational page about animals (dynamics and statics)
3. Replace content with pornography
4. With static approach, the site will be categorized as a site about animals
5. With dynamic approach, its category will be changed to Porno

#### DYNAMIC APPROACH

- Some 100,000 websites get modified every day
- Information on malware websites comes from multiple sources
- Database contains around 500 million websites
- Database is kept constantly updated

#### STATIC APPROACH

- Category updates are rare
- As a rule, the update process is launched manually

## PARENTAL CONTROL

### INTERNET USAGE CONTROL

UserGate Parental Control lets you to establish Internet access to allow or deny access at a certain time or on certain days.

The screenshot displays the KinderGate Parental Control software interface. On the left, a sidebar lists navigation options: 'The most visited categories', 'The most visited sites', 'Last blocked requests', 'Traffic diagramm', and 'Detailed statistics'. The main window features a 'Traffic diagramm' showing a line graph of internet usage in MB over time, with peaks around 07/05, 13/05, and 19/05. The right-hand pane is titled 'Internet Access Control' and includes a 'Register product' button, 'Statistics', 'Rules', 'Settings', and 'About' tabs. Under the 'Rules' tab, there are sections for 'Site Categories', 'Content Filtering', 'Address Restrictions', 'Time Restrictions', and 'Advanced Rules'. The 'Time Restrictions' section is active, showing options for 'Unrestricted', 'Day Access', and 'Custom Restrictions'. The 'Day Access' section shows internet access allowed between 09:00 and 15:00 hours. The 'Custom Restrictions' section features a grid for setting allowed and denied times by day of the week. The grid shows allowed times (orange) from 09:00 to 15:00 on weekdays and from 09:00 to 18:00 on Saturdays. A legend indicates that a left mouse click sets denied time and a right mouse click sets allowed time. A 'Stop Filters' button is also visible.

## PARENTAL CONTROL

### INSTANT MESSENGERS CONTROL

KinderGate Parental Control also lets you restrict the use of instant messengers (ICQ, MSN, Yahoo, Jabber, mIRC).

You can also deny downloads of certain files (EXE, DOC, MP3, AVI, etc.).

### MONITORING AND STATISTICS

In addition to restricting access, you can use KinderGate Parental Control to monitor web resources visited by your children.

KinderGate generates reports of visited URL categories, online applications and games, connection time, etc.

You can use the statistics provided by the program to determine if restricting your child's Internet usage is reasonable.
