

USERGATE PROXY & FIREWALL

Internet Access Management, Information Security,
Traffic Management and Access Control

INTERNET ACCESS MANAGEMENT

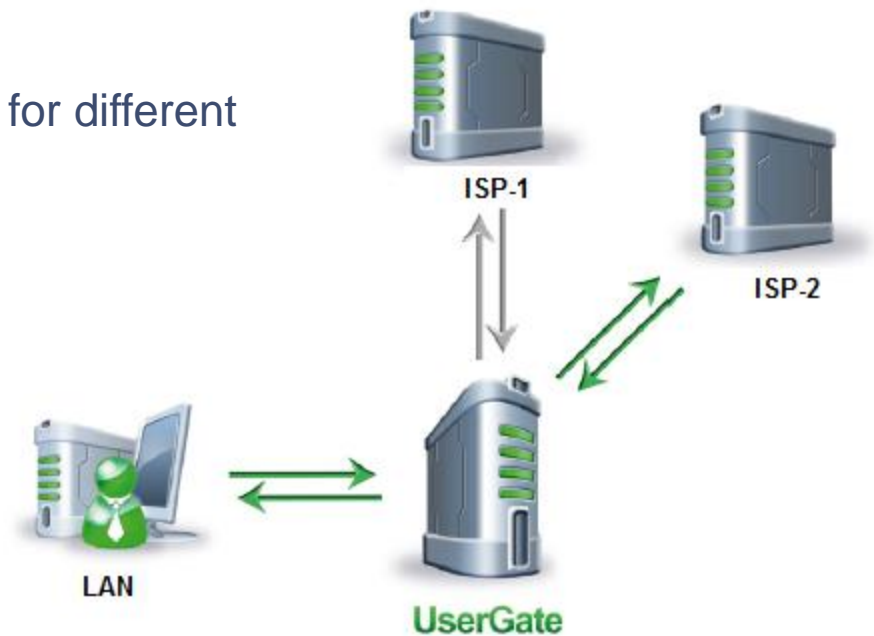

- Internet access management
- Proxy servers for multiple protocols
- Multiple ISP support >
- Backup channel support >
- Bandwidth management >
- Web caching
- IP telephony support >

MULTIPLE ISP SUPPORT BACKUP CHANNEL

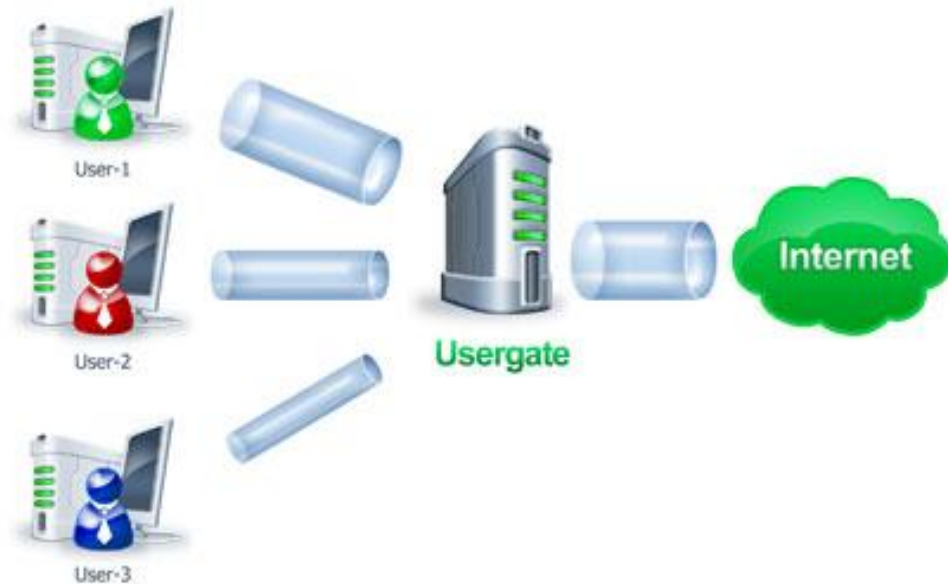

Benefits:

- More reliable Internet access
- Different channels can be used for different types of traffic

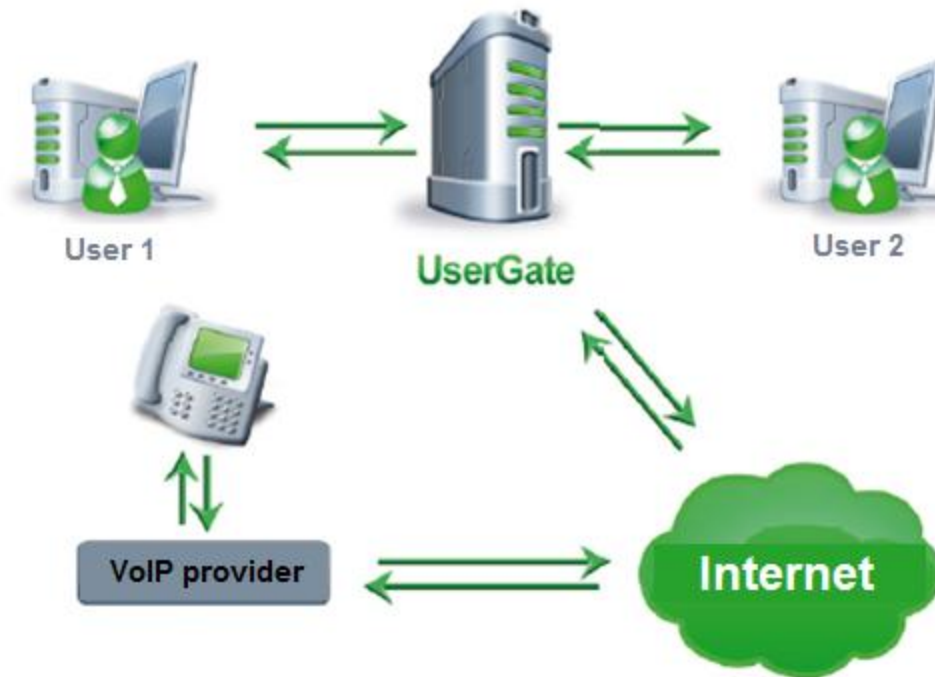

BANDWIDTH MANAGEMENT

- Set specific bandwidth values for different protocols and types of traffic
- Control bandwidth for individual users

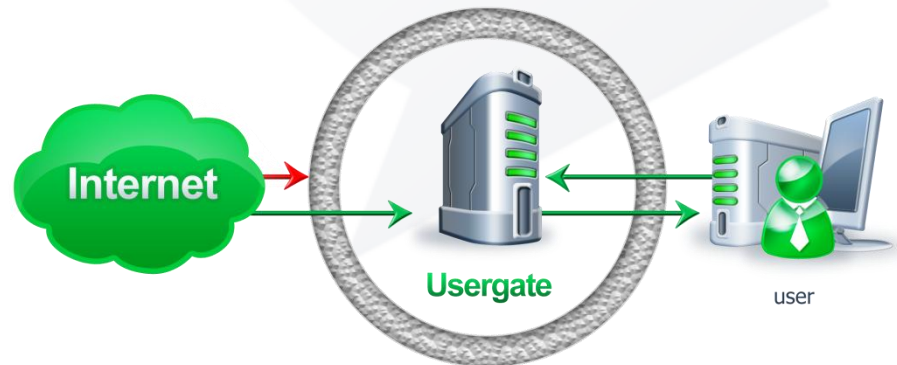

IP TELEPHONY SUPPORT

- SIP and H.323 support
- Comprehensive phone calls statistics

INFORMATION SECURITY

- Dual antivirus protection 
- Firewall
- Integrated NAT driver
- VPN support

DUAL ANTIVIRUS PROTECTION

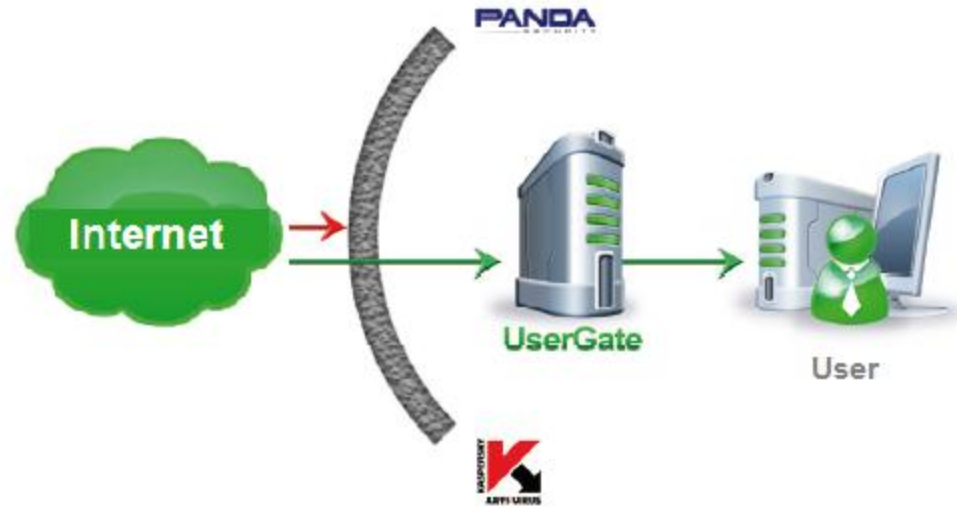

UserGate installation options:

- Without a virus scanner
- With Kaspersky Antivirus
- With Panda Antivirus
- With two antivirus modules

Functions:

Antivirus modules scan all your http, ftp, pop3 and imap traffic.

Integrated firewall module protects your system from external intrusions.

MONITORING AND MANAGEMENT FEATURES

- Application control 
- URL filtering 
- Speed limitations and traffic quotas
- Real-time session monitoring 
- Detailed statistics
- Billing

APPLICATION CONTROL

Our unique application control module is a valuable add-on to the standard antivirus protection. Its features include:

- Use Internet access policies (for example, you can deny access from older Internet Explorer versions)
- Deny Internet access to applications listed as unwanted in your corporate policy (download managers, instant messengers, P2P clients, etc.)
- Monitor applications used by users for Web access

BRIGHTCLOUD URL FILTERING MODULE

- Database with over 470 million websites
- All widely spoken language websites classification support

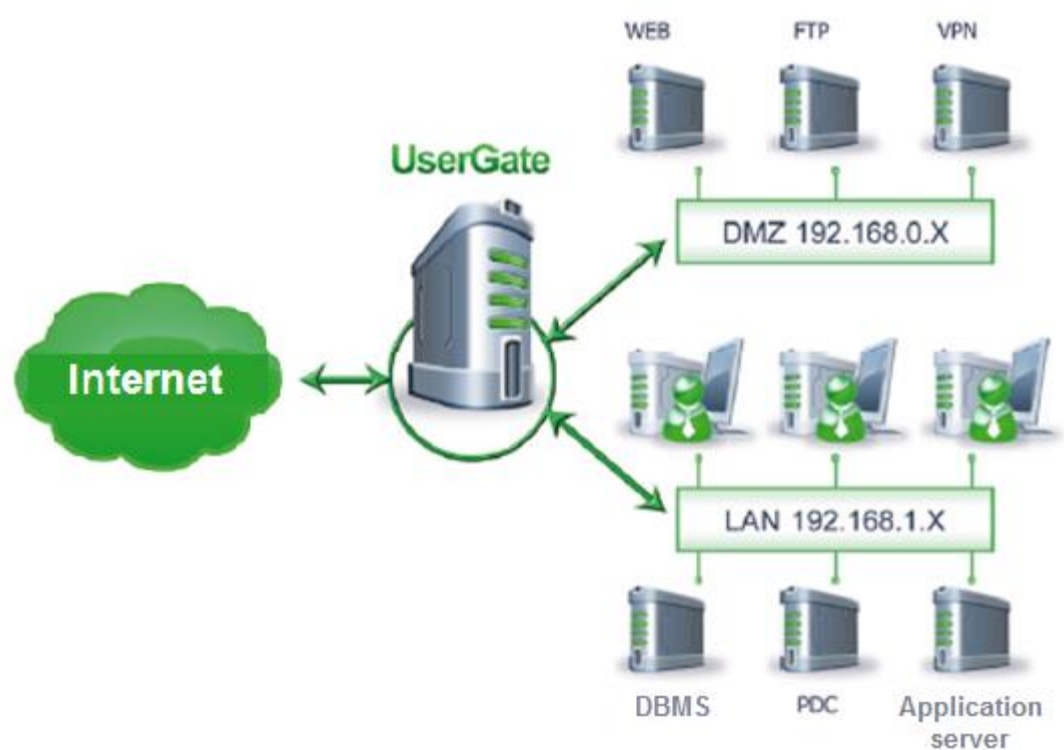

Source: Study of Internet usage by 50,000 employees at over 3,000 companies (performed by Entensys in 2009).

SESSION MONITORING AND STATISTICS

- **A manager can view:**
 - Detailed website request statistics for all employees
 - Traffic cost information
- **The following actions may be applied to any user:**
 - Assign traffic quota
 - Set channel bandwidth
 - Deny connection via certain protocols
 - Determine categories of allowed websites
 - Set internet access time for a user

NETWORK ADMINISTRATION

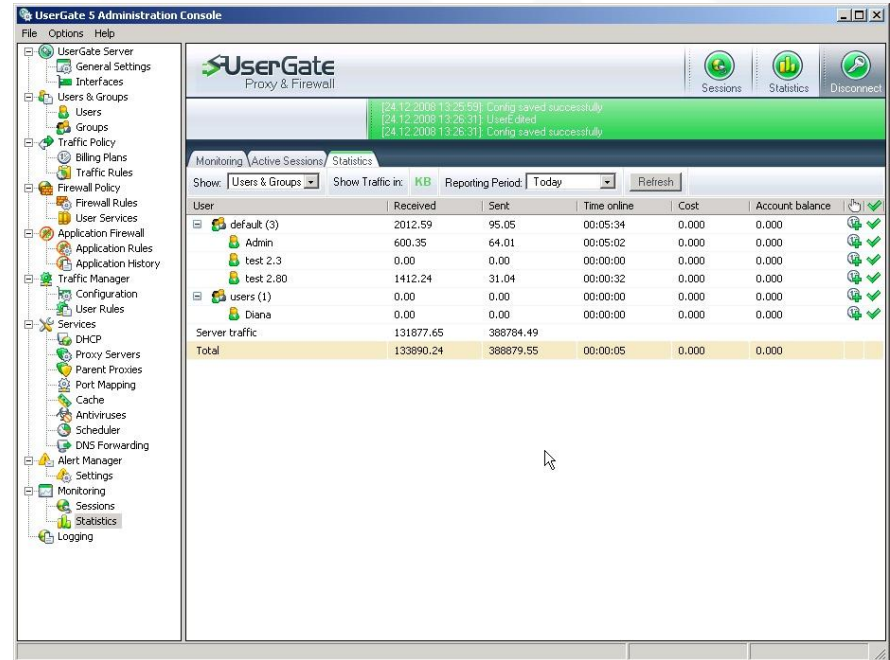

- DHCP support
- Routing
- Resource publishing
- Remote administration

USER-FRIENDLY INTERFACE

UserGate proxy server is controlled from the administrator console.

You may use the administrator console remotely from any machine in your LAN or from anywhere in the world via the Internet.

The screenshot displays the UserGate 5 Administration Console interface. The left sidebar contains a tree view of configuration categories such as General Settings, Interfaces, Users & Groups, Traffic Policy, Billing Plans, Firewall Policy, Application Firewall, Traffic Manager, Services, and Monitoring. The main window shows the 'Monitoring' tab with a table of active sessions and statistics. The table includes columns for User, Received, Sent, Time online, Cost, and Account balance. A 'Total' row is highlighted at the bottom of the table.

User	Received	Sent	Time online	Cost	Account balance	
default (3)	2012.59	95.05	00:05:34	0.000	0.000	🔄
Admin	600.35	64.01	00:05:02	0.000	0.000	🔄
test 2.3	0.00	0.00	00:00:00	0.000	0.000	🔄
test 2.80	1412.24	31.04	00:00:32	0.000	0.000	🔄
users (1)	0.00	0.00	00:00:00	0.000	0.000	🔄
Diana	0.00	0.00	00:00:00	0.000	0.000	🔄
Server traffic	131877.65	388784.49				
Total	133890.24	388879.55	00:00:05	0.000	0.000	

ADVANTAGES

- Easy to integrate
- Wide range of features
- Use of innovative technologies
- Advanced reliability achieved through partnering with the leading vendors in the industry
- Cost efficiency

SOFTWARE PACKAGES

- UserGate Proxy & Firewall
- UserGate + Kaspersky Antivirus
- UserGate + Panda Antivirus
- UserGate + Kaspersky Antivirus + Panda Antivirus
